

"The Next-Generation Automated Financial Auditing & Risk Detection Platform for Enterprises."

1. THE PROBLEM

- **Incomplete Audit Coverage:** Traditional enterprise audits sample <20% of financial transactions, leaving critical data unverified.
- **Delayed Fraud & Anomaly Discovery:** Manual reconciliation processes delay isolation of ledger variances and control breaches.
- **Passive ERP Architecture:** Enterprise systems record data but lack native continuous risk detection engines.

2. THE SOLUTION & TECHNOLOGY

SAEIS is an automated financial auditing engine connecting directly to enterprise ERP databases (such as Onyx Pro and SQL platforms) to execute 100% continuous transaction auditing without operational downtime.

- **Automated Reconciliations:** Continuous trial balance transfers, automated inventory variance logging, and ledger analysis.
- **Granular Drill-Down:** Visual decomposition trees to trace financial statement shifts down to atomic ledger entries.
- **IFRS / IAS Regulatory Logic:** Native compliance frameworks aligned with IAS 1, IAS 2, IAS 36, and IFRS 16.

3. COMPETITIVE ADVANTAGE

- **Regional ERP Depth:** Seamless API integration with regional ERP systems overlooked by legacy global tools.
- **100% Audit Coverage:** Replaces statistical sampling with complete automated data validation.
- **70% Efficiency Boost:** Drastically reduces man-hours required for CFOs and internal audit teams.

4. STRATEGIC ROADMAP

- **Phase 1 (Completed):** Database architecture, core automated auditing logic, and inventory engines validated.
- **Phase 2 (Q3/Q4 2026):** Accelerator deployment, pilot onboarding with B2B enterprise partners, API integration.
- **Phase 3 (2027):** Regional headquarters establishment in Riyadh & commercial expansion across MENA.

5. MARKET OPPORTUNITY (MENA)

\$4.2B+

TAM (ERP & Risk Market)

\$850M+

SAM (Target Mid-Enterprise)

6. BUSINESS & REVENUE MODEL

Stream	Structure
Enterprise SaaS	Annual recurring tiers based on volume & nodes.
Setup & Integration	One-time configuration fee per ERP enterprise.
Audit Firm Licenses	Recurring per-client management licenses.

7. SEED TARGET & USE OF FUNDS

\$26,500 (Seed Target)

Product & API Integration (40%)	\$10,600
Riyadh Hub & Legal (30%)	\$7,950
B2B Sales & Outreach (20%)	\$5,300
Operational Reserve (10%)	\$2,650

8. LEADERSHIP & VISION

Osama Abbas Ali (Founder & CEO) — Financial Accountant with specialized expertise in IFRS/IAS compliance, accounting cycle automation, SQL/Power BI analytics, and enterprise system design.
