

SAEIS

Smart Audit & ERP Integration System

"The Next-Generation Automated Financial Auditing & Risk Detection Platform for Enterprises"

Founder & CEO: Osama Abbas Ali | Email: Osamaabmasoodi@gmail.com |
Phone: +967 775 902 204

1. Document Executive Overview

This document outlines the standard 10-slide Venture Capital Pitch Deck for **SAEIS**. It is designed to demonstrate technical depth, regulatory compliance (IFRS/IAS), market scalability, and clear financial viability for Seed investors.

2. The Problem — The Silent Audit & Compliance Gap

- **High Reliance on Manual & Sample Auditing:** Traditional audits analyze less than 20% of enterprise transactions using random sampling, leaving vast financial data unverified.
- **Delayed Fraud & Anomaly Detection:** Manual reconciliation processes cause critical delays in discovering ledger discrepancies, inventory variances, and internal control breaches.
- **Isolated ERP Infrastructures:** Modern ERP systems capture data but lack native, real-time automated audit engines to evaluate risk continuously before financial reporting.

3. The Solution — Real-Time Automated Intelligence

- **Continuous Automated Auditing Engine:** SAEIS connects directly to enterprise databases, automatically auditing 100% of financial transactions without operational downtime.
- **Direct ERP System Integration:** Seamless API connectivity with regional and global ERP platforms (e.g., Onyx Pro and enterprise SQL databases) to execute automated reconciliations.
- **Real-Time Anomaly & Variance Tracking:** Instantly isolates variances in physical vs. ledger inventory, accounts receivable shifts, and complex multi-party vendor transactions.

4. Core Technology & System Features

- **Automated Reconciliation Workflows:** Automated trial balance transfers, automated inventory variance logging, and ledger-level auditing.
- **Granular Decomposition Analysis:** Visual decomposition trees allowing executives and auditors to drill down from financial statements to source transaction entries in seconds.
- **IFRS / IAS Regulatory Alignment:** Built-in audit logic aligned with international accounting standards (IAS 1, IAS 2, IAS 36, IFRS 16).
- **Enterprise Security & Control:** Role-based permissions, encrypted data pipelines, and immutable audit logs.

5. Market Opportunity (MENA Region)

- **TAM (Total Addressable Market):** **\$4.2B+** Regional market for Enterprise Resource Planning (ERP), Risk, and Compliance software in MENA.
- **SAM (Serviceable Addressable Market):** **\$850M+** Target segment across medium-to-large enterprises, audit firms, and retail/manufacturing sectors.
- **SOM (Serviceable Obtainable Market):** Target initial market share in Saudi Arabia and the Gulf region during the first 24 months.

6. Business & Revenue Model

Revenue Stream	Description	Billing Cycle
Enterprise SaaS Tiers	Tiered pricing based on processed transaction volume and ERP connector nodes.	Annual / Monthly Recurring
Integration & Deployment	One-time setup and custom ERP connector configuration fee for large enterprises.	One-Time Fee
Audit Firm Licenses	Dedicated multi-client management dashboards for external audit firms.	Per-Client Recurring

7. Competitive Advantage

- **Localized ERP & Market Depth:** Deep native integration capability with regional ERP systems (unlike rigid global tools).
- **100% Coverage vs. Sampling:** Complete transaction auditing versus traditional sample-based testing.
- **70% Operational Efficiency Gain:** Drastically cuts down hours spent by internal audit teams and CFOs on manual adjustments and variance troubleshooting.

8. Execution Roadmap & Milestones

- **Phase 1: Product & Architecture (Completed):** Core database schema designed, automated reconciliation logic built, and initial inventory auditing engines validated.
- **Phase 2: Accelerator Deployment & Pilot Testing (Q3/Q4 2026):** Finalizing regional accelerator applications, onboarding initial B2B pilot clients, and refining real-time ERP APIs.
- **Phase 3: Commercial Expansion (2027):** Regional headquarters establishment in Riyadh, scale B2B sales force, and deploy enterprise SaaS packages across MENA.

9. Seed Funding Target: \$26,500

Product Development & API Connectors (40%) — \$10,600

Regional Expansion & Legal Incorporation (30%) — \$7,950

B2B Sales & Marketing Outreach (20%) — \$5,300

G&A & Operational Reserve (10%) — \$2,650

10. Leadership & Investment Call-To-Action

Osama Abbas Ali — Founder & CEO

Financial Accountant with deep expertise in IFRS/IAS compliance, accounting cycle automation, SQL/Power BI data modeling, and enterprise system design.

"Join us in building the standard for automated financial auditing and corporate governance in the region."
